Google Certified Data Analytics Professional

PROFESSIONAL SUMMARY

Data Analyst with 3.5 years of experience turning raw operational and field data into reporting that drives decisions. Proficient across the full analytics workflow — data cleaning, modelling, KPI definition, and dashboard development — using SQL, Python, R, Power BI, and advanced Excel. Combines strong statistical grounding (hypothesis testing, regression, experimental design) with a track record of automating reporting and surfacing insights that improve operational efficiency and decision turnaround.

TECHNICAL SKILLS

SQL: Data Retrieval, Aggregations, Window Functions, Subqueries, Views, CTEs, Data Cleaning, Data Modelling

Python: Pandas, NumPy, Matplotlib, SciPy, Exploratory Data Analysis, Jupyter Notebooks

R: Tidyverse, ggplot2, dplyr, Exploratory Data Analysis, Data Manipulation, Quarto

Machine Learning: Linear Regression, Random Forest, Logistic Regression

Statistics: Hypothesis Testing with ANOVA, t-test, A/B Testing

Power BI: Power Query, Data Modelling, Data Visualization, Interactive Dashboards

Excel (Advanced): Pivot Tables, Charts, Data Cleaning, Formulas and Functions

Databricks: Data Modelling, Data Visualization, Interactive Dashboards

Google Cloud: BigQuery, Looker Studio, Google Cloud Storage

WORK EXPERIENCE

Data Analyst - Zilla Panchayath, Ballari

Nov 2022 — Present

- Built an automated attendance tracking system in Python and Excel, cutting manual processing time by 90% and enabling same-day reporting for field supervisors.
- Designed and maintained Excel dashboards to track 1.2 lakh person-days of labour, giving management real-time visibility into project output and resource utilisation.
- Analysed real-time field data from ground teams to identify operational bottlenecks, surfacing insights that accelerated issue resolution between government departments and local communities.
- Modelled and validated financial data for a ₹5 crore government project, supporting budget reconciliation and audit readiness across reporting periods.
- Produced weekly data summaries translating raw field inputs into structured reports for senior officials, improving decision turnaround time.

Research Associate — Environmental Management and Policy Research Institute May 2022 — Aug 2022

- Conducted field surveys across 4 handicraft centres and 400 artisans to assess wood usage and resource constraints.
- Analysed supply-demand gap of raw wood for Karnataka handicrafts, identifying a 21.6% shortfall (891 m³) in availability.
- Delivered policy-focused recommendations on agroforestry and sustainable sourcing; findings were published.

PROJECT EXPERIENCE

Laptop Price Prediction [Python, SciPy, Streamlit] | [GitHub](#) | [Live App](#)

- Performed EDA on 1,244 laptops across 19 brands for feature extraction and engineering.
- Built a Random Forest regression model achieving $R^2 = 0.88$ and mean squared error of 0.037.
- Deployed the model as a Streamlit web application for real-time price prediction.

ANOVA Analysis — Effect of Pre-Sowing Treatment on Leaves [R]

- Designed and ran experiments on 8 angiosperms with 4 hormonal treatments to study rooting potential.

- Analysed root count, length, and diameter in R (tidyverse); produced publication-ready graphs and insights.
- Findings contributed directly to thesis research outcomes and finding best treatment for producing clones.

Sleepycat's Order Fulfilment Efficiency [\[Excel\]](#)

- Cleaned and standardised 30,000 order records across 3 months in Excel, resolving data quality issues that were causing inaccurate delivery time calculations.
- Analysed fulfilment efficiency across 15 products and 7 cities, identifying the 3 city-product combinations with the longest delivery delays and highest return rates.
- Uncovered a systematic gap between estimated and actual delivery times, recommending revised ETA logic that would improve delivery prediction accuracy for customers.

Cyclist Bike Share Performance Analysis [R, Quarto] | [Analysis](#)

- Processed and analysed 5.8M bike-share trips (Jul 2022 — Jun 2023) using R (tidyverse).
- Identified key usage patterns by rider type and season; delivered strategic recommendations on bike rebalancing and membership promotions.

EDUCATION

Master of Science in Forestry — University of Agricultural Sciences, Dharwad Feb 2023 | CGPA: 8.61 / 10

- Designed experiments for hypothesis testing, causal inference, and statistical validation (ANOVA, t-tests, regression).
- Published research findings; presented analytical work to academic panels.

Bachelor of Science in Forestry — University of Agricultural Sciences, Dharwad Apr 2019 | CGPA: 8.12 / 10

CERTIFICATIONS

Google Data Analytics Professional Certificate (Coursera) | [View](#)

SQL Intermediate Certificate (HackerRank) | [View](#)

Data Science Certification (OdinSchool)

ADDITIONAL

Languages: English, Telugu, Kannada, Hindi

Interests: Technical blogging on data science projects in [R](#) and Python
